WhatsApp Coexistence, Broadcast & CRM Tracking ? Complete Guide
FocusChain Labs ? Leads Agent CRM

Version: J

Table of contents

1. Executive summary ? is this possible?

2. What y

1. Executive summary ? is this possible?

Yes. Meta?s WhatsApp Cloud API supports:

| Capability | Possible? | How |

|-----

What is NOT possible: WhatsApp Business App-style ?broadcast lists? to unlimited cold contacts without approved templates and opt-in. Meta enforces this at the API level.

2. What you already have

[code block ? see markdown source]

Deployed service: FastAPI webhook (whatsapp_webhook.py) on Render/Koyeb/HuggingFace Space.

Secrets:
GEMINI_A

3. Architecture diagrams

3.1 Coexistence ? one number, two clients

[code block ? see markdown source]

3.2 Broadcast + tracking flow (new)

[code block ? see markdown source]

Part A ? WhatsApp Coexistence (detailed Meta steps)

Coexistence lets Srikanth keep using the WhatsApp Business app on his phone while your Cloud API webhook still receives every customer message.

A.0 Before you start ? pick your path

| Your situation | Recommended path |

|-----|

> Your number +91 99383 41236 was API-first. If you need Coexistence on that exact number, schedule a maintenance window (see docs/WHATSAPP_COEXISTENCE.md).

A.1 Prerequisites checklist

- [] Meta Business Manager verified

- [] Admin

A.2 Meta Developers ? open your app

1. Go to <https://developers.facebook.com/apps>

2. Select y

A.3 Start Embedded Signup with Coexistence

> Meta calls this flow ?Onboard WhatsApp Business app users? (Coexistence).

If you use Meta?s dashboard directly (no custom Embedded Signup UI):

1. WhatsApp ? API Setup or Getting Started

2. Look fo

If you embed signup in your own product (developers):

In your Facebook Login FB.login extras, set:

[code block ? see markdown source]

Reference: <https://developers.facebook.com/docs/whatsapp/embedded-signup/custom-flows/onboarding-business-app-users/>

A.4 Step-by-step on screen (what you?ll see)

| Step | Where | Action |

A.5 After Coexistence ? reconnect your stack

1. Update Phone Number ID in all hosts:

- Webho

A.6 Keep Coexistence alive

- Open WhatsApp Business app at least once every 13 days

- Do not u

Part B ? Mass broadcast from CRM

B.1 Two legal send modes

Mode	When to use	API function	Cost
------	-------------	--------------	------

|-----|

B.2 How to broadcast in your CRM (today)

1. Open Streamlit CRM ? Find leads

2. Click Se

Each send stores:

- wamid m

B.3 Rate limits & best practices

- Send sequentially (CRM does this) ? Meta throttles burst traffic

- For >100

Part C ? Track interactions & auto-update CRM

C.1 What gets tracked automatically

| Event | Webhook source | CRM update |

|-----|

C.2 Customize button ? stage mapping

Edit `utils/wa_events.py`:

[code block ? see markdown source]

Button IDs must match what you define in the Meta message template.

C.3 View campaign stats in CRM

After a broadcast, the WhatsApp popover shows last campaign stats:

X read ? Y delivered ? Z failed

Full per-lead detail is on each contact's `wa_events` array (visible in GitHub/Postgres CRM; Supabase flat sync omits nested fields ? use GitHub or Postgres for full tracking).

Part D ? What you must do (checklist)

From your end ? one-time setup

- [] Meta Business verification complete

- [] Perma

For promotional broadcasts

- [] Create message template in Meta Business Suite ? WhatsApp Manager ? Message templates

- [] Wait for

For tracking

- [] Ensure webhook receives status events (send test message, check logs for status_delivered)

- [] Confir

Part E ? Template creation for promotions

E.1 Where to go

1. <https://business.facebook.com/> ? WhatsApp Manager

2. Left me

E.2 Recommended template structure

| Field | Example |

|-----|

> Button payload IDs become interaction_id in webhooks ? map them in INTERACTION_STAGE_MAP.

E.3 Submit & wait

- Review time: minutes to 48 hours

- Status w

E.4 Send from CRM

1. Select leads with phone numbers

2. WhatsA

Part F ? Troubleshooting

| Problem | Fix |

|-----|

Health check

[code block ? see markdown source]

Test status tracking

1. Send WhatsApp broadcast to your own phone from CRM

2. Open m

Appendix ? Environment variables

Variable	Where	Purpose
----------	-------	---------
